Product Overview

Model: R612
Patent Pending

Transceiver Specifications

- Model No.** : R612
- Dimension** : 21 x 72 x 144 mm
- Weight** : 224 grams
- Material** : High Impact Plastic Case
- Battery** : Four AA Batteries (Not Included)
- Transmitter** : Cellular (GSM)
- Sensors** : OPTICAL - Infrared LED and CMOS Sensors
: PIR - Passive Infrared Motion Sensor

Front View

2 Door Sensors
(PIR & LED)

Bottom View

6 Mail Sensors
(LED)

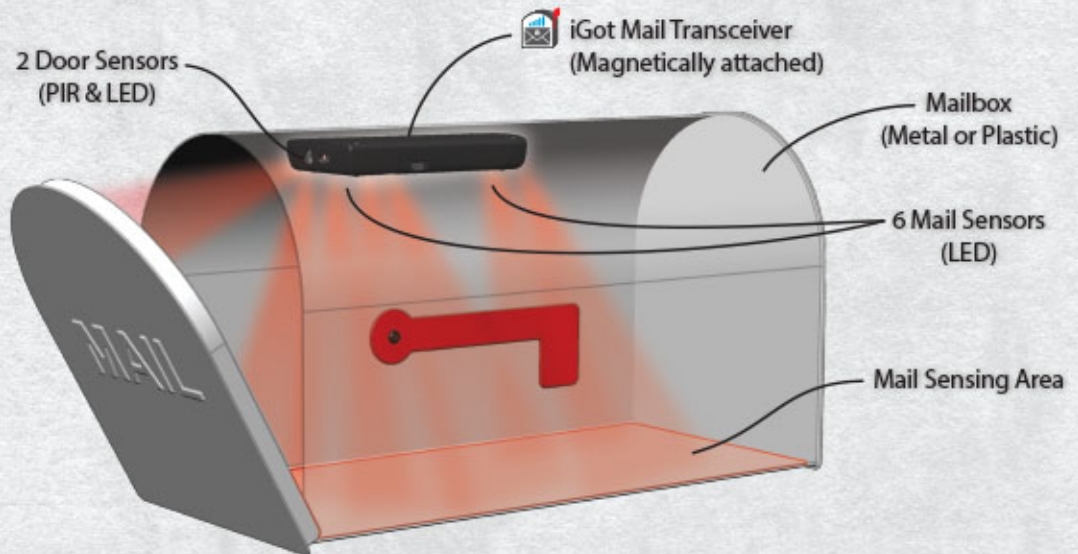

How It Works

Inside your Mailbox

2 Door Sensors - work together to determine door moment and position

6 Mail Sensors - calibrate your mailbox when empty and then detected mail coming in or going out by comparing consecutive measurements. Multiple readings are taken from every sensor and analyzed with the on-board micro computer then the result are transmitted through a secure cellular network and relayed to your mobile device.

Features and Benefits

- ✉ Compact design fits most mailboxes styles
- ✉ Multiple sensors accurately detect changes inside your mailbox
- ✉ Get notified when mail is delivered, picked up, door left open, and mailbox full
- ✉ Receive notifications anywhere in the world that has Internet and GSM cellular networks
- ✉ Works with free app for iOS and Android or with any web browser
- ✉ Highly customizable user settings, including your choice of notifications for mail delivered, picked up, door left open, and mailbox full
- ✉ Long battery life, up to 24 months in most locations, using four AA batteries
- ✉ Cellular data service included for one year, then month by month service, without contract
- ✉ Quick installation and removal, allowing easy iGot Mail mailbox relocation
